# NixVPN

## A Hosted VPN Solution

NixVPN allows you to log into your office network from anywhere in the world. It includes all the features you would expect from an enterprise Virtual Private Network (VPN) without being complicated.

### Instant Access from any Internet Connection

NixVPN leverages on the Internet and uses the highly mature SSL/TLS protocol to establish a safe and secure tunnel back to your office. Within a few clicks, you can access files, email, and network applications as if you were directly connected to your network.

With NixVPN, access to your office network is available securely from any Internet connection!

### Key Benefits

- ✓ Employees stay productive from anywhere
- ✓ Secure 128/256 bit encryption over all data transfer
- ✓ Access everything as if you are plugged into the office network
- ✓ Enable client-to-site and site-to-site access using the same solution

### No Hardware Required

- \* Secure, hardware-free VPN solution
- \* No hardware cost
- \* Reduces complexity of setting up a new device
- \* Works with your current computer and/or server
- \* **Does NOT** require any static public IP address

### Simple Setup

- \* Simple GUI installation
- \* Up and running in minutes
- \* Deploy new sites and setup users without hassle
- \* Setup can be completed by users and administrators alike

### Uncompromising Security

- \* NixVPN has been built from scratch with security in mind
- \* **Does NOT** require opening of any incoming ports on your firewall
- \* Uses OpenSSL encryption, authentication, and certification
- \* All VPN traffic is encrypted using 128/256 bit encryption over SSL

### Unsurpassed Ability

- \* Able to tunnel any IP subnetwork over a single UDP or TCP port
- \* Able to tunnel networks through connection-oriented stateful firewalls
- \* Does not require use of explicit firewall rules
- \* Uses sophisticated and intelligent compression algorithms
- \* Works on all major operating systems i.e. Linux, Windows 2000/XP and higher, OpenBSD, FreeBSD, NetBSD, Mac OS X, and Solaris

Nixperience Pte Ltd is a Singapore-based Linux Resource Company that focuses on Linux based technology solutions. We develop and integrate Open Standard Technologies led by Open Source Software and the Linux Operating System to deliver affordable and reliable server and network services, communications and security infrastructure solutions.
